

Course	Level	Unit	Project
Interactive Design	2	ISG 2003	Playing with Numbers

ISBG Year 2

Playing with Number5!

Advanced Digital Practice.

Set 1410/09

Crit presentation 21/10/2009

Present 28/10/2009

Copy this movie clip, move it left a little, make it bigger, change its colour, make it transparent rotate it, flip it, blur it, do it 4000 times!!

Using action script we can dynamically make interesting visuals that can not be replicated again easily, it allows us to generate large quantities of creative and interesting visuals extremely easily, just by changing a few numbers!

Re affiliate that lost love of maths through visually inspiring investigation.

Project:

Play with numbers, using skills learnt in tutorials, generate a series of creative animations that are visually interesting and experimental. The final animation should be presented on screen and produced as a poster.

Experiment, enjoy, create, think, visualise, time, pace, colour and play. Joshua Davis may be a good starting point.

Week 0: Action script tutorial

Week 1: Crit additional tutorials on exporting your image as an image or vector. Advanced movie clip manipulation.

Week 2: Presentation of animation with 1 selected visual as a poster
